Amine Ouagi

Pentester

Profile

Self-taught cybersecurity professional with proven bug bounty earnings and hands-on pentesting experience across web apps, cloud, and Active Directory. Passionate about weaponizing vulnerabilities and developing custom red team tools

Education

Baccalaureate Degree at Lycee Moulay El hasan , Missour
September 2021 - June 2022

Bachelor in Renewable Energy at Ifmeree, Tanger
October 2022 - August 2024

Employment History

Freelancer | Bug Bounty Hunter
December 2023 - Present

- Conducted ethical hacking and penetration testing on real-world web applications across platforms like Bugcrowd, HackerOne, and Intigriti
- Identified and exploited vulnerabilities including XSS, CSRF, IDOR, SSRF, SQLi, and business logic flaws, leading to successful bug bounties
- Performed in-depth reconnaissance (subdomain enumeration, API testing, endpoint analysis) to uncover hidden attack surfaces
- Authored detailed vulnerability reports with proof-of-concept (PoC) exploits, helping organizations patch critical security flaws
- Improved security posture for clients by providing remediation guidance and validating fixes

Projects

RedHax
- Automated time-based/error-based SQLi with heuristic payload generation
- Supported WAF bypass techniques (chunked encoding, comment obfuscation)
- Integrated auto-shell for PostgreSQL/MySQL/MSSQL → RCE conversion

CloudHax
- AWS/Azure/GCP IAM privilege escalation detector
- One-click S3 bucket takeover via misconfigured ACLs
- Serverless attack module: Lambda

Portfolio

Skills

Active directory pentesting:
Active Directory enumeration and reconnaissance

Kerberos-based attacks

NTLM relay attacks

Lateral movement strategies

Privilege escalation vectors

Web Application Pentesting:
OWASP Top 10

Auth/Logic Flaws

API Security

Cloud Security & Pentesting:
IAM Exploitation

Serverless Threats

Storage Attacks

K8s/Container Breaches

Volunteering
